**Note on people\_named:** smotrich flagged as borderline — left empty pending operator confirmation that he is explicitly named and analytically characterized in the full body text (WebFetch returned summaries, not verbatim body). If confirmed present, add `smotrich` to `people_named`.

**Note on canonical\_lines:** all five candidates are verbatim-uncertain (WebFetch summarized, not returned full body text). Operator should confirm exact phrasing from the published piece before `canonical_lines.md` entries are written. Tags are proposed; text is reconstructed from summary and may not match the published exact wording.
